### **StratEdge Moves to New San Diego Facilities** *Increases manufacturing, package assembly, test, & cleanroom offerings*

**San Diego, Calif. – November 8, 2007** – StratEdge, leader in the design and production of semiconductor packages for microwave, millimeter wave, and high speed digital devices, announces it has moved its headquarters to new, state-of-the-art facilities. Still located in San Diego, California, the new site enables StratEdge to increase capabilities and space for package design, manufacturing, assembly, and test, and to streamline these processes to maximize quality and efficiency.

The new StratEdge facility is located at 6335 Ferris Square, Suite C, San Diego, CA 92121. It contains 12,268 square feet and includes a Class 100 manufacturing area for precision bare die assembly. StratEdge had resided at the previous location on Viewridge Avenue for sixteen years. Besides corporate offices, the plant will house design, manufacturing, assembly, and test for StratEdge's high performance packages that operate at frequencies from DC to over 50 GHz. The main manufacturing lines in the new facility are thick film printing, furnace operations, plating, and microelectronics assembly, which includes component attachment, wire bonding, and electrical test. StratEdge is an ISO 9001:2000 facility.

“Maximizing efficiency and protecting the environment are extremely important to us at StratEdge,” said StratEdge president and CEO Tim Going. “We were able to design and build our new offices to our own specifications for optimal manufacturing and traffic flow, improved efficiency, and to increase space for our assembly and packaging services, which have grown considerably over the past year. We are also putting many green practices into effect, such as our closed-loop water purification system.”

#### **About StratEdge**

StratEdge, founded in 1992, designs, manufactures, and provides test and assembly services for a complete line of high performance semiconductor packages operating from DC to 50+ GHz for

the high speed digital (OC-48, OC-192, OC-768), mixed signal, broadband wireless, satellite, point-to-point/multipoint, VSAT, and test and measurement industries, as well as aerospace stripline filters. StratEdge offers ceramic, low cost hermetic SMT, and metal packages. Most packages are lead-free and meet RoHS and WEEE standards. For more information contact StratEdge at 866-424-4962, email: [info@stratedge.com](mailto:info@stratedge.com), or visit our website at [www.stratedge.com](http://www.stratedge.com).
